MASSETIC SUITE

SAP based powerful solutions for Shutdown & Preventive Maintenance

MASSETIC: UNLOCK THE TRUE VALUE OF SAP EAM

SAP-certified add-on Solution Suite for Asset Intensive Organizations

Massetic suite of solutions is helping asset-intensive organizations who use SAP EAM for their plant maintenance achieve increased uptime of assets, reduced turnaround duration, and increased wrench time while keeping maintenance costs significantly low. Massetic is a set of three different mobile and portal SAP add-on solutions designed specifically for SAP customers. The portal solutions leverage the power of Fiori architecture to give users an intuitive and seamless experience in managing the maintenance processes.

Massetic STOP4

STOP4 is a unique SAP-based seamless planning, execution, and reporting solution for Shutdown and Turnaround management. A complete, comprehensive, powerful, and easy-to-use solution, it supports the plant maintenance team to manage Shutdown / Turnaround processes within the planned duration and cost while not compromising on the scope.

Massetic SEAM4

Massetic SEAM4 is an SAP-based seamless planning board to support the plant maintenance team. SEAM4 assists planners by effectively collating real-time information in simple ways for consumption and thus taking informed, appropriate and timely actions. As a result, the solution helps in higher asset uptime, increased technician productivity, and reduced MTTR.

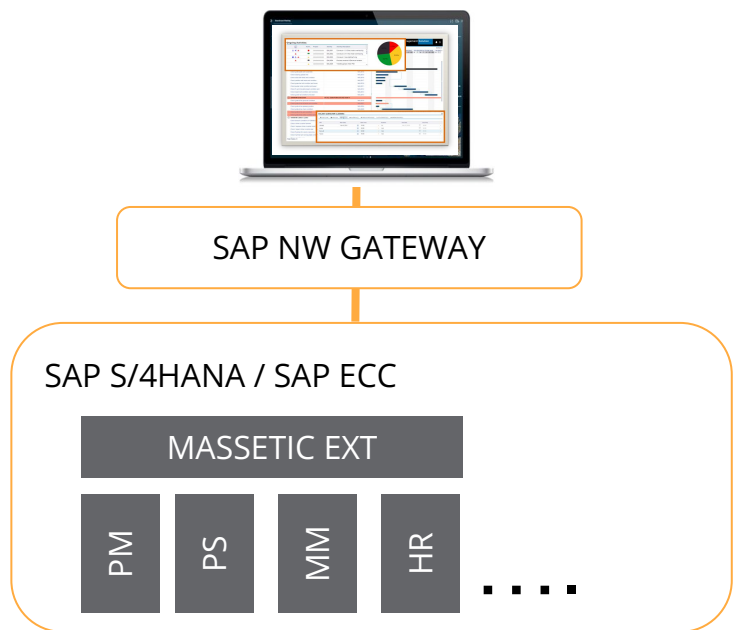

Massetic MOAST4

MOAST4 is an enterprise-class, modern mobile solution for SAP EAM users. It has an intuitive user interface, powerful offline capabilities, built-in device monitoring features, barcode/RFID support, and camera integration. MOAST4 can be easily customized for organizational-specific processes. In addition, it integrates seamlessly with SAP and third-party solutions.

Architecture & Value Proposition

Fiori Architecture for unique and powerful solutions

Massetic suite is built within SAP leveraging SAP Fiori architecture. It is designed for SAP ECC and S/4HANA and seamlessly works with your existing SAP configurations, be it SAP HR, EHS, PM, PS. It easily integrates with third-party solutions like content management solutions. The architecture ensures that there is no duplication of data, processes, and workflows. It also eliminates the need for costly and cumbersome integration between SAP and third-party planning solutions. It enables users to act at the moment with trustworthy real-time information from SAP.

Massetic Value Propositions
